Birth — 11/9/2005
Elementary school graduation — 6/20/2017
First day of highschool — 9/2/2019
First internship — 1/10/2021
Second internship — 1/10/2022
Third internship — 1/10/2023
Highschool graduation — 6/26/2024
First day of college — 9/9/2025
Began python certification course on Coursera — 9/24/2025

My Journey

My journey into technology began at the Bronx Academy for Software Engineering, where my curiosity transformed into hands-on experience through web development internships. From my first day of school to my high school graduation in 2023, each milestone deepened my understanding and fueled my goal of becoming a software engineer—whether mastering statistics or learning various programming languages. In 2024, I officially launched my career and am now building on my skills before pursuing a related degree at LaGuardia Community College. Beyond coding, I balance my technical passion with skateboarding, volleyball, and gaming, blending active and creative pursuits.

Technical skills

Html,CSS, Bootstrap , JavaScript, React,React router, Framer Motion, Tailwind, Git, And other web development frameworks/librarys

Soft skills

strong communication and leadership skills with experience collaborating in small teams. I enjoy optimizing workflows and streamlining development process making them more efficient. Furthermore I consider myself the quick learner with a passion for mastering new programming languages and frameworks

Education

Bronx Academy for software engineering - Highschool Diploma,2024
LaGuardia Community College- A.S. in Computer Science (expected 2027)

Current Goals

Currently I am advancing my knowledge in Python, c++, pytorch and tensorflow while pursuing opportunities in web development internships. I aim to leverage my web development skills to transition toward AI related software engineering roles in the future. My end goal is to get a job as an AI researcher or an AI architect
